

Renewable Fuels Association

**Responding to Ethanol Incidents  
DVD Order Form**

*Responding to Ethanol Incidents*, funded by the RFA and produced in conjunction with the International Fire Chiefs Association, General Motors, Independent Liquid Terminals Association (ALTA), ANSUL Innovative Fire Solutions, and Williams Fire & Hazard Control, is a technical presentation directed primarily at ethanol plant operators and first responders such as fire marshals. It documents Ethanol Firefighting Foam test results and educates viewers on how to deal with ethanol-related spills and fires. In addition, the film explores how ethanol-blended fuels are produced and distributed, in order to provide a comprehensive background for viewers.

To order a DVD of *Responding to Ethanol Incidents*, please complete the order form below and mail along with your payment of \$20/copy to:

Renewable Fuels Association  
1 Massachusetts Avenue, NW  
Suite 820  
Washington, DC 20001
