RFA's Annual Ethanol Industry Outlook Now Available

Washington – The Renewable Fuels Association today released its Ethanol Industry Outlook 2008 entitled “Changing the Climate.” The Outlook catalogs the important statistics for America’s domestic ethanol industry while providing the most recent, up-to-date facts about the production and use of fuel ethanol.

“2007 was an historical year for ethanol in the U.S. and around the globe,” said RFA President Bob Dinneen. “From landmark energy legislation to unprecedented growth to the rapid development of new technologies, America’s ethanol industry is in the midst of a remarkable evolution. With all the misinformation being passed around about ethanol, the 2008 Ethanol Industry Outlook provides an authoritative source of facts and figures about America’s ethanol industry.”

The Outlook provides historical statistical information about the U.S. ethanol industry from gallons produced to bushels of corn utilized. In addition, the Outlook provides easy-to-read charts and graphs highlighting the critical facts about American ethanol production, including water usage, distillers grains production and consumption, economic contributions, and environmental benefits of ethanol use.

A pdf of the 2008 Ethanol Industry Outlook is available for download at www.ethanolRFA.org/industry/outlook.

###

For more than 25 years, the Renewable Fuels Association has served as the “Voice of the U.S. Ethanol Industry.” The RFA is the national trade association for the U.S. ethanol industry representing ethanol producers, marketers, and service providers.
